

HTML Cheatsheet

Unique Features

- Hypertext markup language used to create web pages
- Uses tags to define the structure and content of a web page
- Can include links, images, videos, audio, and other media types
- Supports forms for user input and interaction

Basic Structure

```
<!DOCTYPE html>
<html>
  <head>
    <title>Page Title</title>
  </head>
  <body>
    <h1>Heading 1</h1>
    <p>Paragraph</p>
  </body>
</html>
```

Tags

- `<html>` : Defines an HTML document
