

afplay Cheatsheet

Overview

afplay is a command-line audio player for macOS. It allows you to play audio files from the command line or from a script.

Usage

```
afplay [options] audio_file
```

Options

- `-v volume` : Set the playback volume (0.0 - 1.0).
- `-t time` : Play the audio file for a specific duration (in seconds).
- `-r rate` : Play the audio file at a specific sample rate.
- `-h` : Display help information.

Examples

Play an audio file:

```
afplay audio_file.mp3
```

Play an audio file with reduced volume:

```
afplay -v 0.5 audio_file.mp3
```

Play an audio file for 30 seconds:

```
afplay -t 30 audio_file.mp3
```
