

Cheatsheets Generated by ChatGPT

100+ AI-generated cheatsheets for various topics, languages, concepts, and hobbies. There may be errors in them; if you find one, please create an issue or pull request to fix it.

All cheatsheets were initially generated from the following prompt:

```
Make a useful cheatsheet for [topic] with an overview of its unique features, code blocks for variables, functions, loops, conditionals, file manipulation, and more, as well as a list of resources. Adjust the terminology you use to match the terms of [topic]. Format the output as markdown. Do not provide any other commentary.
```

followed by `Now make one for [nextTopic]`
