React Cheatsheet

Unique features

- Declarative programming
- Virtual DOM
- Component-based architecture
- One-way data flow
- JSX syntax

Variables

```
const myVariable = 'Hello, World!';
```

Functions

```
function myFunction() {
  // function body
}

const myArrowFunction = () => {
  // function body
};
```

Loops

```
{myArray.map((item) => (
  <MyComponent key={item.id} prop={item.prop} />
))}
```

Conditionals

```
{isTrue ? <TrueComponent /> : <FalseComponent />}
```

File manipulation

```
import MyComponent from './MyComponent';

export default function App() {
  return <MyComponent />;
}
```
